Preface

The present volume contains part of the papers emerged from the Third Brainstorming Week on Membrane Computing (BWMC), held in Sevilla, from January 31 to February 4, 2005, in the organization of the Research Group on Natural Computing from the Department of Computer Science and Artificial Intelligence of Sevilla University. The first edition of BWMC was organized at the beginning of February 2003 in Rovira i Virgili University, Tarragona, while the second edition took place in Sevilla at the beginning of February 2004.

Actually, this third edition was organized in parallel with the workshop *Cellular Computing (Complexity Aspects)* (CCCA) funded by European Science Foundations as a PESC Exploratory Workshop.

Similarly to the first editions, the meeting was conceived as a period of active interaction among the participants, with the emphasis on exchanging ideas and cooperation – with the first three days, those simultaneous with CCCA, also devoted to presentations.

The efficiency of this type of “one week scholarship in Sevilla” was again proved to be very high, with a great number of papers started during the meeting, and with other papers, started before, especially by internet interaction, completed in Sevilla.

The papers included in the present volume, were collected in the form available at a short time after the brainstorming; several of them are still in a preliminary form. The idea is that the volume is a working instrument, part of the interaction started during the stay of authors in Sevilla, meant to make possible a further interaction, this time having a written support.

A parallel volume, *Cellular Computing. Complexity Aspects* (edited by M.A. Gutiérrez-Naranjo, Gh. Păun and M.J. Pérez-Jimenez) was published by Fénix Editora, Sevilla, based on the papers presented and developed during CCCA – details can be found in the area web page <http://psystems.disco.unimib.it>.

After continuing the related research and after a further polishing, a selection of the papers from both the present volume and the CCCA volume will be considered for publication in a special issues of an international journal (after the first BWMC,

a special issue of *Natural Computing* – volume 2, number 3, 2003, and a special issue of *New Generation Computing* – volume 22, number 4, 2004, were published, while after the second BWMC, a special issue of *Journal of Universal Computer Science* – volume 10, number 5, 2004, and a special issue of *Soft Computing* – volume 9, number 5, 2005, were published). Other papers will be submitted to other journals or to suitable conferences. The reader interested in the final version of these papers is advised to check the current bibliography of membrane computing available in the Milano web page mentioned above.

The third edition of the BWMC was a definite success, again growing in comparison with the previous meeting, which was already much larger than the first edition, at least in what concerns the number of participants and the number of papers.

The list of participants as well as their email addresses are given below, with the aim of facilitating the further communication and interaction:

1. Alhazov Artion, University of Tarragona, Spain,
aartiom@yahoo.com
2. Ardelean Ioan, Institute of Biology of the Romanian Academy, Bucharest, Romania,
ioan.ardelean@ibiol.ro
3. Balbontín-Noval Delia, University of Sevilla, Spain,
delia@us.es
4. Bernardini Francesco, University of Sheffield, United Kingdom,
bernardf@dcs.shef.ac.uk
5. Besozzi Daniela, University of Milano, Italy,
besozzi@dico.unimi.it
6. Bianco Luca, University of Verona, Italy,
bianco@sci.univr.it
7. Bonchiş Cosmin, University of Timisoara, Romania,
cosbonchis@yahoo.com
8. Brijder Robert, Leiden University, The Netherlands,
rbrijder@liacs.nl
9. Cardelli Luca, Microsoft Research, Cambridge, England,
luca@microsoft.com
10. Casasnovas Casasnovas Jaume, University of the Balearic Islands, Palma de Mallorca, Spain, dmijcc0@uib.es
11. Cavaliere Matteo, University of Sevilla, Spain,
martew@inwind.it
12. Ceterchi Rodica, University of Bucharest, Romania,
rceterchi@gawab.com
13. Ciobanu Gabriel, A.I. Cuza University Iasi, Romania,
gabriel@info.uaic.ro
14. Colomer Cugat M. Angels, University of Lleida, Spain,
Colomer@matematica.UdL.es

15. Cordon Franco Andrés, University of Sevilla, Spain,
acordon@us.es
16. CsuhaJ-Varjú Erzsébet, Hungarian Academy of Sciences, Budapest, Hungary,
csuhaj@sztaki.hu
17. Deufemia Vincenzo, University of Salerno, Italy,
deufemia@unisa.it
18. Fontana Federico, University of Verona, Italy,
fontana@sci.univr.it
19. Freund Rudolf, Technical University Wien, Austria,
rudi@emcc.at, rudi@logic.at
20. Gheorghe Marian, University of Sheffield, United Kingdom,
marian@dcs.shef.ac.uk
21. Graciani Díaz Carmen, University of Sevilla, Spain, cgdiaz@us.es
22. Gutiérrez-Naranjo Miguel Angel, University of Sevilla, Spain,
magutier@us.es
23. Izbaşa Cornel, University of Timisoara, Romania,
cornel@myri1.info.uvt.ro
24. Krasnogor Natalio, University of Nottingham, United Kingdom,
Natalio.Krasnogor@nottingham.ac.uk
25. Leporati Alberto, University of Milano-Bicocca, Italy,
leporati@disco.unimib.it
26. Mauri Giancarlo, University of Milano-Bicocca, Italy,
mauri@disco.unimib.it
27. Muskulus Michael, Leiden University, The Netherlands,
muskulus@liacs.nl
28. Nepomuceno-Chamorro Isabel, University of Sevilla, Spain,
isabelnepomuc@yahoo.es
29. Nepomuceno-Chamorro Juan Antonio, University of Sevilla, Spain,
janepochamorro@yahoo.es
30. Nepomuceno-Fernández Angel, University of Sevilla, Spain,
nepomuce@us.es
31. Núñez Hervás Rafael, The Autonomous University of Madrid, Spain,
rafaups@yahoo.com
32. Obtulowicz Adam, Polish Academy of Sciences, Warsaw, Poland,
A.Obtulowicz@impan.gov.pl
33. Ortega de la Puente Alfonso, The Autonomous University of Madrid, Spain,
Alfonso.ortega@ii.uam.es
34. Păun Gheorghe, Institute of Mathematics of the Romanian Academy, Bucharest,
Romania, and University of Sevilla, Spain,
gpaun@us.es
35. Pérez-Jiménez Mario de J., University of Sevilla, Spain,
marper@us.es
36. Pescini Dario, University of Milano-Bicocca, Italy,
pescini@disco.unimib.it

37. Riscos-Núñez Agustín, University of Sevilla, Spain,
`ariscosn@us.es`
38. Rodríguez-Patón Aradas Alfonso, Polytechnical University of Madrid, Spain,
`arpaton@fi.upm.es`
39. Rogozhin Vladimir, Abo Akademi University, Turku, Finland,
`vrogzhin@abo.fi`
40. Rogozhin Yurii, Institute of Mathematics and Computer Science, Chisinau,
Moldova,
`rogozhin@math.md`
41. Romero-Campero Francisco José, University of Sevilla, Spain,
`fran@us.es`
42. Romero Jiménez Alvaro, University of Sevilla, Spain,
`Alvaro.Romero@cs.us.es`
43. Sancho Caparrini Fernando, University of Western Ontario, London, Canada,
`fsancho@us.es`
44. Sburlan Dragoş, Constanţa University, Romania, and University of Sevilla,
Spain,
`dsburlan@univ-ovidius.ro`
45. Sempere Luna José María, Polytechnical University of Valencia, Spain,
`jsempere@dsic.upv.es`
46. Shankara Narayanan Krishna, Indian Institute of Technology, Bombay, India,
`krishna@cfdvs.iitb.ac.in`
47. Soler-Toscano Fernando, University of Sevilla, Spain,
`fsoler@us.es`
48. Vaszil György, Hungarian Academy of Sciences, Budapest, Hungary,
`vaszil@sztaki.hu`
49. Verlan Sergey, University of Metz, France,
`verlan@sciences.univ-metz.fr`
50. Zandron Claudio, University of Milano-Bicocca, Italy,
`zandron@disco.unimib.it`

As mentioned above, the meeting was organized by the Research Group on Natural Computing from Sevilla University (<http://www.gcn.us.es>)– and all the members of this group were enthusiastically involved in this (not always easy) work. The meeting was supported from various sources: (i) Proyecto de Investigación TIC2002–04220–C03–01 de Ministerio de Ciencia y Tecnología of Spain, (ii) Acción Coordinada IMUS 2003, (iii) Grupo de Investigación en Computación Natural (PAI TIC 193) de Junta de Andalucía, (iv) II Plan Propio de la Universidad de Sevilla, as well as by the Department of Computer Science and Artificial Intelligence from Sevilla University.

Gheorghe Păun
Mario J. Pérez-Jiménez
(Sevilla, April 10, 2005)

Contents

Maximally parallel multiset–rewriting systems: Browsing the configurations <i>A. Alhazov</i>	1
Evolution–communication P systems: Time–freeness <i>A. Alhazov, M. Cavaliere</i>	11
P systems with one membrane and symport/antiport rules of five symbols are computationally complete <i>A. Alhazov, R. Freund</i>	19
Minimal cooperation in symport/antiport P systems with one membrane <i>A. Alhazov, Yu. Rogozhin</i>	29
On modelling ion fluxes across biological membranes with P systems <i>I.I. Ardelean, D. Besozzi</i>	35
Metabolic algorithm with time-varying reaction maps <i>L. Bianco, F. Fontana, V. Manca</i>	43
WebPS: A web-based P system simulator with query facilities <i>C. Bonchiş, C. Isbaşa, D. Petcu, G. Ciobanu</i>	63
Abstract machines of systems biology (extended abstract) <i>L. Cardelli</i>	73
Specifying dynamic software architectures by using membrane systems <i>M. Cavaliere, V. Deufemia</i>	87
Event–related outputs of computations in P systems <i>M. Cavaliere, R. Freund, A. Leitsch, Gh. Păun</i>	107

EP-colonies: Micro-organisms in a cell-like environment <i>E. Csuhaj-Varjú</i>	123
Editing configurations of P systems <i>C. Csuhaj-Varjú, A. Di Nola, Gh. Păun,</i> <i>M.J. Pérez-Jiménez, G. Vaszil</i>	131
Matrix languages, register machines, vector addition systems <i>R. Freund, O.H. Ibarra, Gh. Păun, H.-C. Yen</i>	155
A simulator for confluent P systems <i>M.A. Gutiérrez-Naranjo, M.J. Pérez-Jiménez, A. Riscos-Núñez</i>	169
Simulating avascular tumors with membrane systems <i>M.A. Gutiérrez-Naranjo, M.J. Pérez-Jiménez,</i> <i>F.J. Romero-Campero</i>	185
First steps towards a geometry of computation <i>M. Muskulus, R. Brijder</i>	197
A tool for using the SBML format to represent P systems which model biological reaction networks <i>I. Nepomuceno, J.A. Nepomuceno, F.J. Romero-Campero</i>	219
Christiansen grammar for some P systems <i>A. Ortega de la Puente, R. Núñez Hervás,</i> <i>M. de la Cruz Echeandía, M. Alfonseca</i>	229
Further twenty six open problems in membrane computing <i>Gh. Păun</i>	249
One more universality result for P systems with objects on membranes <i>Gh. Păun</i>	263
Dynamical probabilistic P systems: Definitions and applications <i>D. Pescini, D. Besozzi, C. Zandron, G. Mauri</i>	275
Further results on P systems with promoters/inhibitors <i>D. Sburlan</i>	289
Recognizing membrane structures with tree automata <i>J.M. Sempere, D. López</i>	305
On a class of P automata as a machine model for languages over infinite alphabets <i>G. Vaszil</i>	317
