Contents

Deterministic Solutions to QSAT and Q3SAT
by Spiking Neural P Systems with Pre-Computed Resources
T.-O. Ishdorj, A. Leporati, L. Pan, X. Zeng, X. Zhang ...................... 1

On the Power of Insertion P Systems of Small Size
A. Krassovitskiy ................................................................. 29

Simulation of Recognizer P Systems by Using Manycore GPUs
M.A. Martínez-del-Amor, L. Pérez-Hurtado, M.J. Pérez-Jiménez,
J.M. Cecilia, G.D. Guerrero, J.M. García ................................ 45

Sleep-Awake Switch with Spiking Neural P Systems:
A Basic Proposal and New Issues
J.M. Mingo ................................................................. 59

The Computational Complexity of Uniformity
and Semi-uniformity in Membrane Systems
N. Murphy, D. Woods ................................................................. 73

Structured Modeling with Hyperdag P Systems: Part A
R. Nicolescu, M.J. Dinneen, Y.-B. Kim ........................................ 85

Spiking Neural P Systems and Modularization of Complex Networks
from Cortical Neural Network to Social Networks
A. Obtułowicz ................................................................. 109

The Discovery of Initial Fluxes of Metabolic P Systems
R. Pagliarini, V. Manca ................................................................. 115

New Normal Forms for Spiking Neural P Systems
L. Pan, Gh. Păun ................................................................. 127

Spiking Neural P Systems with Anti-Spikes
L. Pan, Gh. Păun ................................................................. 139
Contents

Spiking Neural P Systems with Neuron Division and Budding
L. Pan, Gh. Păun, M.J. Pérez-Jiménez........................................ 151

Efficiency of Tissue P Systems with Cell Separation
L. Pan, M.J. Pérez-Jiménez.................................................. 169

Some Open Problems Collected During 7th BWMC
Gh. Păun.............................................................................. 197

A Bibliography of Spiking Neural P Systems
Gh. Păun.............................................................................. 207

Introducing a Space Complexity Measure for P Systems
A.E. Porreca, A. Leporati, G. Mauri, C. Zandron...................... 213

Parallel Graph Rewriting Systems
D. Sburlan........................................................................... 225

About the Efficiency of Spiking Neural P Systems
J. Wang, T.-O. Ishdorj, L. Pan............................................... 235

Author index ........................................................................ 253
