<b>Descripción</b>			
It would be interesting to keep relative paths, when the data, model or config files are inside the folder structure of MeCoSim.

Changes in functionalities related to file paths have been performed, achieving the goals of the issue. They consist in saving the relative paths (instead of the absolute ones) when the paths are included inside the user folder (from where MeCoSim was launched).

These changes are available in the [last version of MeCoSim](#).
